The following is an examiner's statement of reasons for allowance: Claims 55-80 define over the art of record in that none of the art has a sensor on a support, with a layer that minimizes the formation of thrombus, where the sensor detects a metabolic product of nitric oxide. Applicant has not explicitly limited this term in the specification. However, it is the examiner's position that the term would be understood by one skilled in the art. Publication 2003/0136673 states that nitric oxide is converted in the body to nitrate, nitrite, and S-nitrothiol and the examiner is limiting the term to this.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert L. Nasser whose telephone number is 571 272-4731. The examiner can normally be reached on m-f 9-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles Marmor II can be reached on 571 272-4730. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
